PROFESSIONAL SUMMARY

Product Designer with 4+ years of experience designing B2B SaaS and enterprise software across construction, property management, procurement, and mobile applications. Skilled in simplifying data-heavy workflows, building reusable design systems, and collaborating with product managers and engineers from discovery through developer handoff. Also builds independent web products and responsive marketing websites using modern frontend technologies.

PROFESSIONAL EXPERIENCE

UI/UX Designer | PT IFCA Property365 Indonesia Jul 2022 – Present

- Designed web and mobile experiences for ContractX, ProjectX and property-related applications, translating complex business processes into structured user flows and usable interfaces.
- Created reusable UI components and design-system foundations, including design tokens, patterns, states and documentation to improve consistency across products.
- Collaborated with product managers, developers and consultants on requirements, wireframes, prototypes, interaction details and developer-ready specifications.
- Contributed to procurement, tendering, contracts, budgeting and administration workflows, emphasizing information hierarchy, tables, forms and multistep processes.
- Collaborated across teams on project workflow reviews, including on-site cross-country work in Malaysia.

SELECTED DESIGN WORK

ContractX — Sub-Contract Tender | Enterprise SaaS
Designed mobile-oriented subcontractor and multi-round tender workflows, focusing on clarity and task progression.

ProjectX | Enterprise SaaS · Web & Mobile
Designed project administration, scheduling, cost tracking and budgeting interfaces for project-based organizations.

IFCA Core Design System | Design Systems
Developed scalable design foundations and reusable web/mobile component patterns for consistent interactions and visual language.

Ruang Kelas — Teacher & Parent Apps / Super Admin | EdTech
Designed mobile experiences and a data-heavy Super Admin console; portfolio screens use sample data.

Kemang Village / The Bellezza | Residential Mobile Apps
Worked on resident services, facility access and property-related UX journeys.

INDEPENDENT & COLLABORATIVE PROJECTS

Pancong POS | Independent · In development
Designing and developing an F&B POS web app for menus, add-ons, orders, payments and reporting.

R3G Software POS — Landing Page | Collaborative · Live
Designed and developed the responsive marketing website for a collaborative POS business. r3gpos.web.id

Bima Wicksn — Wedding Filmmaker Portfolio Website | In development
Designing and developing a responsive video-focused portfolio and personal-branding website.
